PROFESSIONAL SUMMARY

AI Engineering Intern and Computer Science Undergraduate building full-stack and applied-AI production systems in Python, React, SQL, and REST APIs, including an LLM-gated automated trading agent and a computer-vision-based AI exam proctoring platform. Delivered data pipelines processing 2M+ healthcare records and solved 1,000+ algorithmic problems across competitive programming platforms. Focused on reliable, scalable software with measurable real-world impact.

EDUCATION

CMR Institute of Technology | B.Tech in Computer Science Engineering

Sep 2023 - Jul 2027

CGPA: 8.14/10

Ships Junior College | Telangana State Board of Intermediate Education, MPC

Jun 2021 - May 2023

Marks: 986/1000

Saraswathi Vidya Nikethan High School | Secondary School Certificate

Mar 2021

CGPA: 10.0/10.0

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript, SQL

Full Stack: Node.js, FastAPI, REST APIs, React, HTML, CSS, Bootstrap

AI/ML: TensorFlow.js, OpenCV, TensorFlow, Machine Learning, Artificial Intelligence (AI), Large Language Models (LLM)

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Databases & Developer Tools: MySQL, SQLite, Git, GitHub, VS Code, Docker (Basics)

EXPERIENCE

AI Engineering Intern | Flex Data Pvt. Ltd. (Remote)

Sep 2025 - Present

- Engineered Python/SQL data pipelines processing 2M+ patient records, building reusable validation and preprocessing modules that improved dataset reliability for downstream ML workflows.
- Translated ambiguous operational requirements from cross-functional stakeholders into LLM-enabled automations, reusable backend modules, and data transformations for internal AI/ML workflows.
- Diagnosed and fixed a recurring production data-corruption defect in a live AI automation pipeline by redesigning the state-write path with atomic writes and read-back verification, eliminating the failure class entirely.
- Owned end-to-end architecture and delivery of two production AI agents for the team, a Discord-based conversational agent and an AI-powered stock-prediction/trading system (detailed under Projects), backed by a 120+ test regression suite.

PROJECTS

Stock Market Signal Automation & AI Trading Agent (Flex Data) | [GitHub](#)

Python, REST APIs, SQLite, LLM Integration

- Building a Discord-based agent that parses natural-language equity and options instructions, including multi-leg strategies, into structured, validated trade orders.
- Implemented an LLM-gated prediction engine to approve trade decisions, executed automatically via a brokerage REST API with real-time stop-loss/take-profit risk controls.
- Designed a durable, crash-recovering signal queue with idempotent processing and a self-learning module that adapts trade-approval confidence from historical outcomes, validated under 500+ concurrent signals and 100+ automated regression tests.

RAG Document Summarizer | AI Document Q&A Platform | [GitHub](#) | [Live Demo](#)

Python, Flask, React, TypeScript, LLM APIs

- Built a full-stack Retrieval-Augmented Generation platform that chunks and embeds PDF, DOCX, and TXT uploads into a persistent vector store, then answers questions grounded in those documents with token-streamed responses.
- Designed a swappable provider layer that configures chat and embedding models independently by environment variable, running fully local on Ollama in development and on Groq and Gemini APIs in the deployed build.
- Shipped to production with per-document and whole-library summarization, click-through citations exposing each retrieved snippet and similarity score, and rate limiting plus a shared-secret gate protecting every API-cost-incurring route.

ACHIEVEMENTS

- Secured Telangana State Rank 5 in Intermediate 1st Year and Rank 9 in Intermediate 2nd Year (986/1000 marks).
- Recognized among the top performers in the Smart Interviews training batch for two consecutive years.

COMPETITIVE PROGRAMMING

- Solved 1,000+ Data Structures and Algorithms problems across LeetCode, CodeChef, Codeforces, Smart Interviews, and other competitive programming platforms.
- LeetCode: 572 accepted problems, maximum contest rating 1757 | CodeChef: maximum rating 1595 | Codeforces: maximum rating 1193 | Smart Interviews: ranked among the global top 600 and 2nd in college batch.

CERTIFICATIONS

- Salesforce Certified Agentforce Specialist, Agentblazer Legend | Salesforce (Dec 2025 - Jan 2026)
- Smart Coder (Data Structures and Algorithms) | Smart Interviews
- Advisory Launchpad Program | PwC AC India (Aug 2026)
- Networking Essentials, Network Technician Career Path | Cisco Networking Academy (Jan 2026)
